Subject:	SGA Application Received: Meeting with the Financial Affairs Committee on November 16th at 4:10pm

Hi Jessica!

I hope your weekend has been wonderful! I am so glad that Student Government Association has received a funding application from your organization! My committee, the financial appropriation committee, is looking forward to meeting with you **Monday November 16th at 4:10pm!**
Either yourself or a member of your organization must be present at this meeting in order to be considered for funding- *please do not send an advisor.* The meeting will be in the Bresnahan Suite 3. We ask that you arrive ten minutes prior to your scheduled appointment.
The committee will likely ask several questions based on your application below. These questions will be about your organization, its benefit to YSU, the costs, and then some organization specific questions about fundraising and community.

Sincerely,

Sam Anderson

Vice President of Financial Affairs, Student Government Association
Student Trustee, Youngstown State University

10/31/2015 0:22:34	YSU ACM-W	1 month	ACM-W student chapter of Youngstown State University of the Association for Computing Machinery's Committee on Women in Computing	YSU ACM-W's mission is to inform, celebrate and support our students in computing. We also work with the ACM-W community of computer scientists, educators including K-12, and employers to improve working and learning	The ACM-W student chapter at YSU will greatly benefit students on campus as they will see through our various activities that computing is possible for anyone to get into	We hope to have various speakers. These speakers would potentially be faculty members and even professionals from local businesses. We will have a biweekly program of the week setup where the participant	Recruitment ($100) Food ($200) Prizes as incentives for various activities ($200) Transportation to local schools for activities during STEM week and the December Hour of Code ($200)	The appropriation of funds will allow us to do various outreach activities such as STEM week at local schools and the December Hour of Code. We want to engage students, both middle/high	5	We plan to recruit students through various activities. We will have information tables and sessions. We hope to get students from a variety of backgrounds such as math, engineering and the physical	jlw

				environments for women.	regardless of your gender. We will create more awareness of the various types of computing fields for people to take an interest in.	who gets the answer correct gets a prize. The results of this biweekly competition will also be posted on local and social media. We also plan on going out into the community to talk to elementary, middle school and high school students to try to raise awareness about computer science. We also want to co-sponsor events with other student groups such as ACM, PME, and IEEE. We will make a proactive effort to do this. Once every semester, we will plan a workshop to engage women in the community via various activities. We recently applied for a grant from NCWIT to support our group.		and college students. To engage college students we will have our biweekly programming "contests." We will encourage students from other disciplines to participate by providing problems from a range of backgrounds.	sciences. We will attempt to recruit these students by providing speakers and activities that appeal to them. We want to attract both male and female students. By trying to recruit both male and female students we can begin to create an environment where we form a community of male allies to further fight stereotypes in the workforce.
